(54) CD HOLDER

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a bag-shaped CD holder which can house a plurality of CDs, and in addition, can prevent the recorded surface of the housed CD from being scratched.

SOLUTION: For this CD holder, a longitudinally long rectangular paper is doubly folded at a location slightly shifted from the central cross line, and a first non-superposed part 15 is formed, and the doubly folded paper is further doubly folded at a location which is slightly shifted from the central cross line in such a manner that the first non-superposed part may become outside, and a second non-superposed part 16 is formed, and pocket-form CD housing parts are formed by affixing the peripheries of the internal surfaces by a gluing part in a manner to make the first and second non-superposed parts 15, 16 an opening part. Two sheets of CD 2 can be housed, and in addition, under a housed state, the CDs 2 are separated from each other by the paper, and even if a load is applied to the CD holder by stacking books in which this CD holder is bound, the CD 2 is prevented from being scratched.
